Test plan:
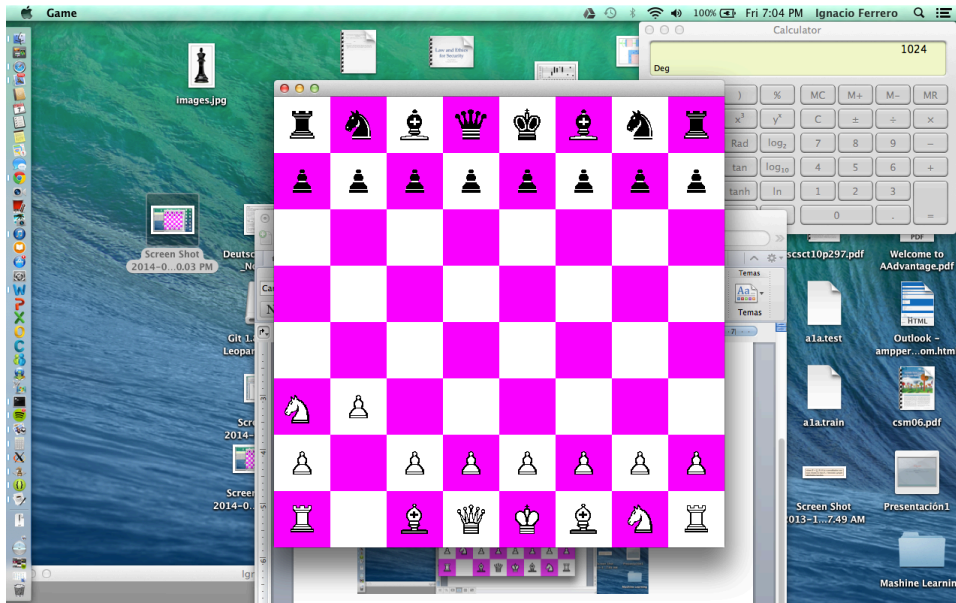

1) Initiate the Chess application
2) Check all possible moves
    a. Move a piece outside the board(it should return to the position)
    b. Move a piece to a not possible position inside the board , occupied  by another of your pieces, or an impossible move
    c. Move a piece to a possible position , it should place the piece to this new

STARTING POSITION Knight (0,1)
A)Move Knight outside the box – not allowed , return to the initial position
B) Move knight to (1, 1) -- Not allowed, , return to the initial position

c)Move knight to (2,0)—Allowed Knigth should move to this new position

Conclusion: All moves are implemented, there fore you could try every move you like
and check the correctness
